

Create Template

1-Create base template in the app

>> create templates >> base.html, index.html

```
<!DOCTYPE html>
<html lang="en">
<head>
    <meta charset="UTF-8">
    <meta name="viewport" content="width=device-width, initial-scale=1.0">
    <title>{% block title%} {% endblock%}</title>
</head>
<body>
    {% block content %}
    {%endblock%}
</body>
</html>
```

>>> Create index.html

```
{% extends "book_outlet/base.html" %}

{% block title%}
    All Books
{% endblock %}

{% block content%}
    <ul>
        <li>Book 1....</li>
    </ul>
{%endblock%}
```

>> Create Views.py

```
from django.shortcuts import render

# Create your views here.

def index(request):
    return render(request, "book_outlet/index.html")
```

>> Create urls.py (in the app)

```
from django.urls import path
from . import views

urlpatterns = [
    path("", views.index)
]
```

>> Import template to the project urls.py (in the project)

```
from django.contrib import admin
from django.urls import path, include

urlpatterns = [
    path('admin/', admin.site.urls),
    path("", include("book_outlet.urls"))
]
```
